

LONELY PLACE

By Allan James

Doors to Somewhere

So far you've traveled now,
Landed here in this lonely town,
Long nights have been so hard for you,
Far away from home but you'll make it through,

Love inside a burning glow,
Feed the flames before they go,
Moving forward but you're can't say where,
You'll find the answer when you make it there,

*Lonely... lonely place,
Need to get back home,
Leave this crazy race,
Don't want to be alone,
I see it on your face,
Shows in your eyes...*

Mending dreams hanging on a thread,
I think about the things you've always said,
Looking back now we've seen these signs before,
You got to make it out before the storm,

*Lonely... lonely place,
Need to get back home,
Leave this crazy race,
Don't want to be alone,
I see it on your face,
Shows in your eyes...*

These days are upon us now,
The hard times will fade somehow,
And you can change what you want and will,
You can make it much better still...

Final chorus
